

Characters

1. Aiman – Project Manager (meeting leader)
2. Farah – IT Manager 1
3. Daniel – IT Manager 2
4. Hafiz – Finance Manager 1
5. Lina – Finance Manager 2
6. Siti – HR Manager
7. Mr. Kumar – ERP Vendor Representative
8. Dr. Lim – End User (Lecturer)
9. Dr. Zara – Consultant (optional)

Scene:

**UTM meeting room. Everyone looks tired but serious. The projector says:
“ERP Implementation Meeting – Go Live Soon!”**

SCRIPT

AIMAN (PROJECT MANAGER):
GOOD MORNING, TEAM! TODAY, WE MUST MAKE BIG DECISIONS ABOUT OUR ERP SYSTEM — ARCHITECTURE, VENDOR, AND PROCESS CHANGES. LET’S TRY TO FINISH THIS WITHOUT FIGHTING, OKAY?

HAFIZ (FINANCE 1):
NO PROMISES. EVERY TIME I HEAR “ERP,” I ALSO HEAR “EXTRA COST.”

LINA (FINANCE 2):
YEAH, LAST NIGHT I EVEN DREAMED THE ERP SYSTEM SENT ME AN INVOICE IN MY SLEEP!

FARAH (IT 1):
FINANCE ALWAYS WORRIES ABOUT COST. I’M THE ONE WORRYING IF OUR SYSTEM CAN EVEN RUN ON THE CURRENT SERVER.

DANIEL (IT 2):
TRUE. THE ARCHITECTURE MUST SUPPORT STUDENT DATA, HR, AND FINANCE AT ONCE. IF NOT, THE SYSTEM WILL CRASH LIKE OUR OLD WEBSITE DURING REGISTRATION WEEK.

AIMAN:
Good point. So, Mr. Kumar, tell us — how’s your ERP system architecture different?

MR. KUMAR (ERP VENDOR):
GLAD YOU ASKED! OUR SYSTEM IS CLOUD-BASED, VERY MODERN, AND CAN INTEGRATE DATA FROM ALL DEPARTMENTS. IT’S ALSO SECURE AND SCALABLE.

DR. LIM (END USER):
DOES THAT MEAN I CAN FINALLY ACCESS STUDENT DATA WITHOUT WAITING FIVE MINUTES FOR IT TO LOAD?

Mr. Kumar:
Absolutely! Maybe just... four minutes.

Farah (IT 1):
Four minutes is still too long!

Daniel (IT 2):
Yeah, we might need a stronger internet connection or better hardware.

Hafiz (Finance 1):
Stronger hardware? That means more money again!

Aiman:
Okay team, let’s move to vendor selection. Mr. Kumar’s system is one option. Any others?

Lina (Finance 2):
We received one more proposal — cheaper, but fewer features.

Siti (HR):
Hmm. If it’s too simple, staff might complain there’s no HR module. Then I’ll have to handle everything manually again.

Farah (IT 1):
Exactly. Simpler system means fewer integrations. We'll end up doing double work.

Hafiz (Finance 1):
But the full system is too expensive. Maybe we can negotiate?

Aiman:
Yes, negotiation time! Mr. Kumar, can you give us a student discount? We're a university, after all. 😊

Mr. Kumar:
Hmm... I can give you a 10% discount and some free ERP stickers!

Lina (Finance 2):
Make it 15%, and we'll stick your stickers on our budget report.

(Everyone laughs)

Dr. Zara (Consultant):
Let's also talk about process change. ERP is not just software — it changes how departments work together.

Siti (HR):
That's true. Staff need training and time to adapt. Otherwise, they'll keep using Excel behind my back.

Dr. Lim (End User):
And we must ensure data accuracy. If wrong info goes into the system, students might graduate twice! 😬

Farah (IT 1):

Another limitation — if the system depends on the internet, any downtime will stop all work.

Daniel (IT 2):

Yes, but the benefit is — everything is centralized. We can access info from anywhere.

Aiman:

So, let's summarize:

- **Architecture:** Cloud-based, but need better hardware.
- **Vendor:** Mr. Kumar's system, but negotiate price.
- **Process Change:** Need staff training and data cleaning.
- **Benefits:** Integrated, easier data sharing.
- **Limitations:** Cost and possible downtime.

Hafiz (Finance 1):

Hmm... okay. As long as we get that 15% discount.

Mr. Kumar:

Alright, deal! But only if you promise to go live next month.

Everyone (shocked):

NEXT MONTH?! 🤖

Aiman (Project Manager):

Relax, team! We'll start testing first. If it works, we go live. If not... we blame Mr. Kumar. 😏

Mr. Kumar:

That's not in my contract!

Siti (HR):

Can the contract include free coffee for the training days?

Dr. Lim (End User):

And maybe one more module called "No Error 404"?

Mr. Kumar:

That'll cost—

Hafiz (Finance 1):

Don't say it. 😞

Aiman (Project Manager):

Alright team, meeting done! Let's celebrate — with Mr. Kumar's free stickers!

Everyone:

Yay... (half happy, half tired)
