

DYNAMO LIQUID DETERGENT: SCIENCE BEHIND THE CLEAN

Surfactants from the ingredient list:

- **Anionic Surfactants**
- **Non-ionic Surfactant**
- **Soap**

The Formulation Used

- Anionic + Non-ionic surfactants → Synergistic cleaning effect
- Enzymes → Break down protein-based stains (like sweat, blood, food)
- Perfume & Colorant → Provide fragrance and appealing look
- pH Adjuster & Chelant → Maintain stability and performance
- Soap base → Boosts mildness and biodegradability

Type	Example	Function & Properties
Anionic Surfactants	Linear Alkylbenzene Sulfonate	Produce strong foam, excellent at removing oily and particulate dirt. Work best in soft water.
Non-ionic Surfactants	Alcohol Ethoxylates	Help remove grease and stains; effective even in hard water; low foaming – suitable for machine wash.
Soap	Fatty acid salt	Natural surfactant that enhances cleaning and softens clothes. Biodegradable.

The Usage Guidelines

Machine Wash

- 1 cap for 1 standard load (15–24 pieces of clothing)
- Apply a small amount directly on stains before washing

Hand Wash

- Use 1/3 to 1/2 cap for 6–8 pieces of clothing
- Rinse thoroughly

Precaution:

Do not ingest. If swallowed, drink water and consult a doctor.

Advantages

- Effective in both top-load & front-load machines
- Removes visible and invisible stains
- Long-lasting fragrance
- Halal certified

Disadvantages

- Contains synthetic surfactants (may not suit sensitive skin)
- Non-biodegradable components may impact the environment
- Perfume additives can cause mild allergies in some users
