

POWER OF CLEAN

Safeguarding Health After Influenza A

Lesson Learned

Influenzavirus A spreads fast

Through droplets, sneezing, and contaminated surfaces.

Good hygiene saves lives

Frequent cleaning and proper handwashing stop transmission.

Awareness is protection

Hygiene habits protect not only you but also the community.

Balance is key

Avoid overusing harsh disinfectants; choose safe, sustainable products.

Best Hygiene Practices

Wash hands for at least 20 seconds with soap

Disinfect commonly touched areas (doorknobs, phones, desks)

Cover coughs & sneezes with tissues or your elbow

Avoid sharing personal items like towels or utensils

Keep air fresh — open windows or use air purifiers.

**“HYGIENE FIRST,
HEALTH ALWAYS”**
