Semester II 2024/2025

Subject	:	Data Mining (SECP2753-01)
Task	:	Poster for Association Rules (Assignment 2 Part2)
Due	:	20 June 2025 (Friday) at 5.00 pm
Submission	:	Upload softcopy of the poster (in .pdf format) via e-learning
File name	:	Student, course name and course code
Mode	:	PAIR ASSIGNMENT
Marks	:	20%

Objective:

This assignment aims to enhance your understanding of association rule mining by designing an infographic or poster that explains the concept, key metrics (support, confidence, lift), the Apriori algorithm, and real-world applications (e.g., market basket analysis).

Instruction:

1. Students are required to create a visually appealing infographic or poster that includes the following:

A brief explanation of association rules.

- Definitions and examples of support, confidence, and lift.
- A summary of the Apriori algorithm or another relevant algorithm used to generate rules.
- At least one real-world application example, such as market basket analysis or healthcare diagnosis.
- One simple dataset or transaction table with at least 5 transactions and derived frequent itemsets/rules.
- Visuals such as icons, charts, or diagrams to support your explanation.

2. Students may use tools such as Canva, Piktochart, PowerPoint, Adobe Illustrator, or Google Slides to create the poster.

Note: The use of AI tools to generate your poster are not allowed.

Rubric for Poster

Criteria	Excellent 10-7	Fair 6-4	Poor 3-0	MARKS
Explanation of Association Rules	Clear and accurate description of association rules, including purpose and context.	Moderate clear and accurate description of association rules, including purpose and context.	Vague description of association rules, including purpose and context.	10 X 4
Use of Metrics (Support, Confidence, Lift)	Correct definitions and use of metrics, with appropriate examples.	Moderately correct definitions and use of metrics, with appropriate examples.	Most incorrect definitions and use of metrics, with appropriate examples.	10 X 4
Algorithm Summary	Clear and accurate explanation of the Apriori algorithm	Moderately clear and accurate explanation of the Apriori algorithm	Lack of clarity and accuracy in explanation of the Apriori algorithm	10 X 4
Real-World Application Example	Relevance and clarity of the chosen example in a real-world scenario.	Moderate Relevance and clarity of the chosen example in a real-world scenario.	Lack of Relevance and clarity of the chosen example in a real-world scenario.	10 X 3
Data & Rule Example	Accuracy of the example dataset and derived frequent itemsets/rules.	Moderate Accuracy of the example dataset and derived frequent itemsets/rules.	Major lack of accuracy of the example dataset and derived frequent itemsets/rules.	10 X 3
Visual Design and Clarity	Quality of design, use of visuals, readability, and overall layout.	Moderate quality of design, use of visuals, readability, and overall layout.	Minimal quality of design, use of visuals, readability, and overall layout.	10 X 2
Total				/20
